Lending Management

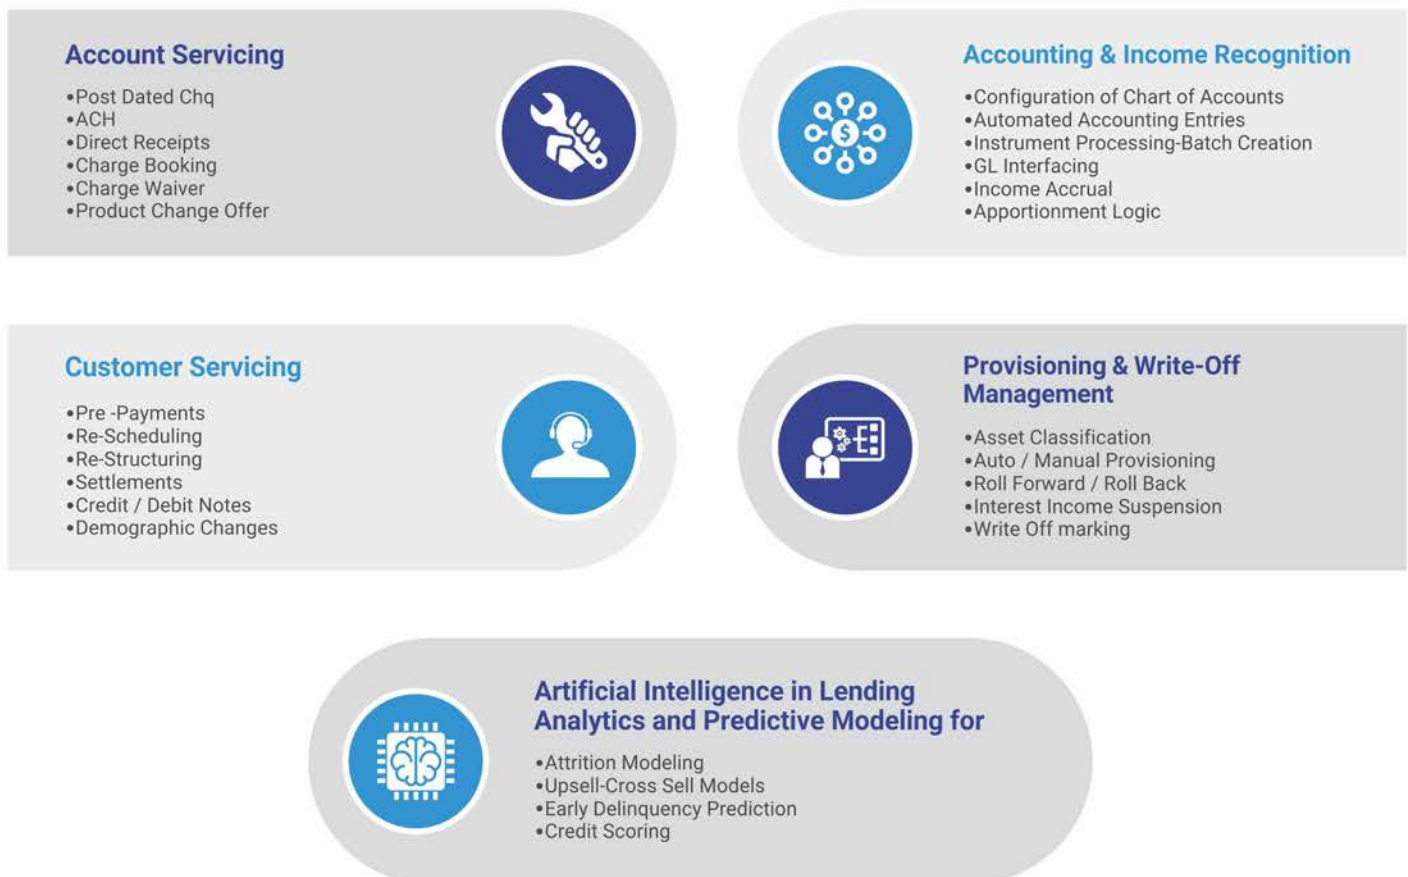

The Lending Management helps automate the servicing and management of multiple lending portfolios on a single platform. The solution provides a comprehensive set of customer and account centric business operations which enable organizations to be more agile and also offers front office customer support capability.

The system facilitates multi-currency, multi-organization and multi lingual capabilities and supports variety of repayment options offered by the Lenders. This solution caters to the requirements of front desk and back office users and seamlessly integrates with third party systems including GL systems, SMS and Email gateways.

Business Set-up

Key Functional Components

Add on Modules
